

Juan Carlos Abad, MD

Dr. Juan Carlos Abad, MD did his ophthalmology residency at Georgetown University and his Cornea and External Diseases Fellowship at MEEI/Harvard Medical School in Boston, MA. He performed the first LASEK procedure in 1996, and has described novel topographic patterns for keratoconus and interesting surgical modifications in the treatment of this condition.

Dr. Abad is currently in private practice in his hometown of Medellin, Colombia, where he publishes regularly. He has had the opportunity to evaluate new surgical devices, such as new keratoprosthesis models, intraocular telescopes, etc.

Juan Carlos has served on the PanCornea Board of Directors since its establishment.
